EDUCATION

Vellore Institute of Technology

Bachelor of Technology in Computer Science

Chennai, Tamil Nadu, India

Expected Aug 2026

PROJECTS

Resume Parsing and Job Recommendation Service | *Python, BERT, PyTorch, Docker, REST API*

- Built a resume parsing and intelligent job-matching system leveraging BERT-based LLM fine-tuning for high-accuracy skill and experience extraction; benchmarked model accuracy across multiple training configurations to optimize recommendation quality.
- Containerized the full dual-interface web app using Docker, enabling scalable deployment and automated evaluation pipelines for ML-driven candidate-to-job scoring workflows.
- Automated bulk resume ingestion and model-based candidate ranking against job descriptions, reducing manual screening effort end-to-end.

Decentralized Freelance Marketplace with Skill NFTs & Sybil Protection | *Solidity, React.js, Web3, Docker*

- Architected a fully decentralized multichain freelancing platform featuring EVM wallet-based authentication, Soulbound Identity NFTs for unique non-transferable user identity, and on-chain Skill NFTs issued only after proof-of-work validation to prevent fake profiles and Sybil attacks.
- Implemented DAO-based governance for decentralized proposal management and dispute resolution, plus milestone-based escrow smart contracts that auto-release funds upon verified work completion.
- Dockerized and deployed the full stack across multiple EVM-compatible testnets; maintained on-chain storage for identity credentials, DAO votes, and transaction records enabling cross-chain reputation portability.

Reconstruction of 3D Space for Spherical Panorama | *Python, PyTorch, Deep Learning, Linux*

- Engineered an end-to-end automated 3D scene reconstruction pipeline from a single 360° panorama, orchestrating deep learning models for monocular depth estimation, object detection, and background segmentation in a fully scriptable Linux-based Python workflow.
- Converted equirectangular panoramas to cube map projections, applied segmentation models to isolate foreground geometry, and lifted 2D detections into 3D representations using depth estimation models.
- Designed the inference pipeline for terminal-driven, reproducible execution across arbitrary input panoramas with zero manual intervention between stages.

CERTIFICATIONS

IBM Certified: DevOps Practitioner

July 2025

IBM – Adroit Technologies

- Covered CI/CD pipeline design, Docker-based containerization, and automated cloud deployment; hands-on labs with Git, Jenkins, Docker, and Kubernetes in production-style infrastructure.

Microsoft Certified: Azure Data Fundamentals (DP-900)

July 2025

Microsoft

- Demonstrated understanding of relational, non-relational, and big data systems; hands-on exposure to cloud-based data storage, processing pipelines, and visualization on Microsoft Azure.

TECHNICAL SKILLS

Programming Languages: Python, Java, C, C++

AI / ML: Large Language Models (LLMs), Generative AI, Model Evaluation & Benchmarking, BERT, PyTorch, TensorFlow, Scikit-learn, NumPy

Systems & DevOps: Linux (POSIX), SSH, Docker, Kubernetes, Git, Jenkins, Ansible, Terraform, CI/CD Pipelines, Grafana, Workflow Automation

Web & Database: React.js, HTML, CSS, JavaScript, SQL, NoSQL, REST APIs

Other: Data Structures and Algorithms, Object-Oriented Programming, Solidity, Web3
